

Peter Sowah

Lead Software Developer at The Cobalt Partners

petersowah@gmail.com

Summary

I am continuously in awe of technology and people's interaction with it. I've always been fascinated by computer systems and wanted to know how they function. This curiosity and passion led me to pursue computer science.

After discovering my passion for programming, I couldn't get enough. I made websites for friends and family, interned with a local business, and hired myself out as a freelancer. This led me to acquire my first full time job with Clickonate Ltd.

With my current job at Cobalt, I've become a proven communicator with great team-working skills from collaborating with numerous teams across functional (engineering, product, UI design, marketing, and testing) and product areas to deliver on large-scale products system.

I am an experienced full-stack web application developer.

Experience
